QUICK REFERENCE GUIDE

■ TOP OVER PARKS (Auto-Boost Total by 0.5-1.0 runs):

1. COL (Coors Field) - Altitude = ball carries 10% farther
2. CIN (Great American) - Small park + wind out
3. TEX (Globe Life Field) - Controlled hitter park
4. PHI (Citizens Bank) - Wind out to short dimensions
5. NYY (Yankee Stadium) - Short RF porch for lefties

*■ TOP UNDER PARKS (Auto-Boost Total by 0.5-1.0 runs):

1. OAK (Oakland Coliseum) - Huge foul territory + marine layer
2. SD (Petco Park) - Marine layer + large OF
3. SF (Oracle Park) - Wind in from bay kills RH power
4. LAD (Dodger Stadium) - Classic pitcher park, marine layer
5. SEA (T-Mobile Park) - Cool temps + marine layer

■ TEMPERATURE FACTORS:

- Every 10°F above 70° = Ball carries ~5 feet farther
- Cold games (<50°F) = Hands stiff, ball doesn't carry (under lean)
- Hot games (>90°F) = Ball flies, pitchers tire faster (over lean)

■ WIND FACTORS:

- Wind OUT 10+ mph = Add 0.5 runs to total (over lean)
- Wind IN 10+ mph = Subtract 0.5 runs (under lean)
- Wind IN at Wrigley = EXTREME pitcher park
- Wind OUT at Wrigley = EXTREME hitter park
- Marine layer (LAA, OAK, SD, SF, SEA) = Ball dies in evening (under)

■ SUN/TIME FACTORS:

- Day games after night games = Tired pitchers, bullpen depleted (over)
- Afternoon sun in batters' eyes = Early innings under, late over
- Shadows crossing plate (3-5 PM) = Batters can't see (under)
- Night games at Coors = Still over park (altitude doesn't sleep)

■ ROOF STATUS:

- CLOSED = Controlled environment, no weather edge
- OPEN = Check wind/temp/humidity for totals edge
- Retractable parks: ARI, HOU, MIA, MIL, SEA, TEX, TOR
