

CFB COACH OVER/UNDER FINGERPRINTS - 2023-2025 (2026 Carousel Edition)
Source: BigDataBall box scores (2023/2024/2025-CFB-team-stats.xlsx)
Closing total = ODDS group CLOSING TOTAL (col 73), verified vs CLOSING SPREAD

METHODOLOGY & ATTRIBUTION

Every (school, season) in 2023-2025 is attributed to the coach who actually held the job that year. Current-school records use first_season_at_school from the coaches database (a coach who arrived year Y owns school-seasons Y..2025). 2026 movers ALSO get a PRIOR-TEAM fingerprint from the audited carry-over map (mid-season firings cut at the firing date, e.g. Franklin/Penn State through 2025-10-11). Seasons we cannot pin to a named coach are bucketed '(coach unknown)' -- NEVER guessed. A fingerprint requires $n \geq 10$ decided games; below that = INSUFFICIENT. Over% excludes pushes. O/U also reflects roster/schedule/conference -- it is a prior, not a law. See attribution_confidence column.

BASELINE: across 106 qualified coaches ($n \geq 10$), aggregate O/U is 1541-1509, 50.5% over. The market is built to produce ~50%.
Extremes $\geq 60\%$ / $\leq 40\%$ on solid n are real, bettable identities.

COVERAGE: 108 current-school fingerprints (106 usable $n \geq 10$), 20 prior-team (2026 mover) fingerprints, 69 unattributed-season buckets.

THE HEADLINE - LANE KIFFIN -> LSU (the marquee totals mispricing)

Kiffin is a hardened UNDER coach: 17-24-0 (42% over) over 41 games at Ole Miss, with a NEGATIVE lean (games landed ~1.6 pts UNDER the number). He inherits an LSU program that just went 21-18 (54% OVER) its last 39 games. The market will anchor LSU totals to the over-prone Brian Kelly roster; Kiffin's identity says UNDER. A 42%-over coach into a 54%-over program = the cleanest carousel total edge.

THE OVER MACHINES (top 15, current school, $n \geq 10$)

Coach	School	n	O/U	ovr%	lean	night
Joe Harasymiak	Massachusetts	12	9-3-0	75%	+1.1	4-1-0

(* = n<10, below fingerprint threshold; conf: HIGH=current coach attrib)

BETTING CONTEXT & CAVEATS

1. O/U is not purely the coach -- roster, schedule, conference pace, and opponent all matter. A fingerprint is a PRIOR, not a law. Portal turnover moves totals.
2. Sample: n>=10 is the floor; n>=25 is where we trust it. Interim/one-season prior fingerprints are flagged LOW CONFIDENCE.
3. Attribution is honest -- unknown seasons bucketed '(coach unknown)', never guessed.
4. All grades use the CLOSING total. Edge = coach tendency vs the number the market settles on. Over% excludes pushes.

TOP ACTIONABLE ANGLES:

1. Kiffin's LSU UNDER (42%-over coach into 54%-over program) -- the headline.
2. Fade the DeBoer-Alabama over (39% over, n=28; market still prices Saban).
3. Cignetti Indiana OVER, hammer at night (68% overall, 89% night).
4. Fickell Wisconsin UNDER (35% over, -4.2 lean, biggest-sample under-lean).
5. Norvell FSU + Desormeaux Louisiana NIGHT UNDERS (clean situational fades).
6. Schiano Rutgers OVER in low-total spots (+6.6 lean on 38 games).
